

Gulfstream 6237

For 2018 we offer a brand new fleet of 2019 Gulfstream Class C RVs. We are very happy with those RVs and the space and quality they offer. We place enormous emphasis on the fact that our units are always spotless and in perfect condition. We have developed a comprehensive system of checks that we use to thoroughly check every unit before and after every rental to ensure absolute quality and mechanical soundness. The motorhomes are characterized by high-quality materials and additional extras and equipment based on our travel experiences and our customers' responds.

With 24 ft length the 6237 is almost 6 feet smaller then its big brother but is due to its intelligent floorplan in no way inferior to the 6280. Therefore you get a very convenient and manageable RV, even for first-timers but also with space easily enough for up to five people.

Inner space

The sleeping area can easily be separated with a curtain and offers a lot of storage space above the comfortable double bed. Since we always want to offer our customers something more, we equipped each of our motorhomes with a higher quality mattress, so you can sleep comfortably, even on vacation!

In this motorhome, the bathroom is located to save space on the right side in the rear.

With the additional window in the very back, the motorhome appears spacious and open. The bathroom has a large shower and a sink with a cabinet attached below. Additional storage space is provided by a generously sized mirror cabinet.

The kitchen with the high-quality stainless steel sink, the large work surface and an additional fold-out workspace offers enough space to comfortably prepare a delicious dinner. It has a large fridge with separate freezer, includes a three-burner gas hob, an oven and a microwave. With a rental you will receive a full equipped kitchen, with sharp knives and a complete set of high quality table ware (for sure no plastic!) Thus, no wishes remain openperson!).

Some technical and additional features:

In addition to the (chassis) starter battery, two large living space batteries are available so you may live without recharging for at least some days. An Onan-Power-Generator is additionally installed, which can be conveniently started from the interior by pressing a button.

Of course, the RV has all the usual things, such as hot water boiler, a roof air conditioning, and huge tanks. In addition, we have also ordered a black tank flush, with which you can flush the toilet tank if necessary.

The floor in the entire motorhome is made of insensitive and easy-care plastic, so no stain-sensitive carpet. This motorhome has a large and from two sides easily accessible outdoor storage space, where your entire luggage will find enough space.

All our campers are equipped with electric windows, electric and heated mirrors, remote-controlled central locking in the cab and even a rear view camera. Despite the stately length, it will help you to keep an overview, even on narrow campgrounds. The audio system has a touch screen, a Bluetooth- and a USB-port.

Of course, for a trip through the southwest you cannot miss an electric awning that can be extended and retracted at the push of a button.

Last but not least - we hope it will never be used - but we also thought of a spare wheel. Even if you do not change it on your own, it saves you from having to rely on windy repair shops, exorbitant prices for tires or even delivery times.
