

Gulfstream 6280

For 2018 we offer a brand new fleet of 2019 Gulfstream Class C RVs. We are very happy with those RVs and the space and quality they offer. We place enormous emphasis on the fact that our units are always spotless and in perfect condition. We have developed a comprehensive system of checks that we use to thoroughly check every unit before and after every rental to ensure absolute quality and mechanical soundness. The motorhomes are characterized by high-quality materials and additional extras and equipment based on our travel experiences and our customers' responds.

Inner space

With the 6280 we come back to the floor plan, we have used for years to the satisfaction of our customers. With a total length of about 9 meters a roomy floorplan for couples but also for families. Many now think of the mass of high fuel consumption. However, considering that even a smaller motor home must have the same features as the big models (all tanks, the same kitchen and not forgetting the same chassis), you will quickly notice that the extra length hardly causes more weight.

In addition, it should be noted that the 6280 manages without slide-out compared to the smaller representatives. This slide usually causes an enormous extra weight due to its massive mechanics.

For that with the 6280 you get a floor plan, which is always spacious, and not only when the slide is extended.

The sleeping area can easily be separated with a door and offers a lot of easily accessible storage space and a comfortable double bed, which is completely bypassable. Since we always want to offer our customers something more, we equipped each of our motorhomes with a higher quality mattress, so you can sleep comfortably, even on vacation!

The bathroom is divided into two parts, but can be connected with the opening and snapping the doors together to an "En-suite" bathroom: This offers a shower cubicle with solid doors and a spacious bathroom, by 5 people can easily stow their utensils!

The corner kitchen with the high-quality stainless steel sink, the large work surface and an additional fold-out workspace offers enough space to comfortably prepare a delicious dinner. It has a large fridge with separate freezer, includes a three-burner gas hob, an oven and a microwave. With a rental you will receive a full equipped kitchen, with sharp knives and a complete set of high quality table ware (for sure no plastic!) Thus, no wishes remain open.

The large dinette can easily be converted into a comfortable bed. But even if you're traveling with five people, you do not have to. Because opposite of the dinette you will find a 3-seater sofa that can be folded out in a few simple steps to a generous bed. This will save you the nightly off-putting of the table and rebuilding.

Two full sleeps are available in the overhead, which is very spacious and also high enough for adults. This overhead is the highest you may get, so you have enough room to go upstairs and not the feeling of sleeping right under the ceiling. What you additionally get with us: More storage space: Since we know that storage space in the motorhome is always in short supply, we got an additional wall unit which offers additional storage space, maybe for the large selection of towels every customer receives from us (11 per person!).

Some additional and technical features

In addition to the (chassis) starter battery, two large living space batteries are available so you may live without recharging for at least some days. An Onan-Power-Generator is additionally installed, which can be conveniently started from the interior by pressing a button.

Of course, the RV has all the usual things, such as hot water boiler, a roof air conditioning, and huge tanks. In addition, we have also ordered a black tank flush, with which you can flush the toilet tank if necessary.

The floor in the entire motorhome is made of insensitive and easy-care plastic, so no stain-sensitive carpet. This motorhome has two large and easily accessible outdoor storage spaces, where your entire luggage will find enough space.

All our campers are equipped with electric windows, electric and heated mirrors, remote-controlled central locking in the cab and even a rear view camera. Despite the stately length, it will help you to keep an overview, even on narrow campgrounds. The audio system has a touch screen, a Bluetooth- and a USB-port.

Of course, for a trip through the southwest you cannot miss an electric awning that can be extended and retracted at the push of a button.

Last but not least - we hope it will never be used - but we also thought of a spare wheel. Even if you do not change it on your own, it saves you from having to rely on windy repair shops, exorbitant prices for tires or even delivery times.
